Fair Trade Enterprise.

Rice & Carry employee in Sri Lanka

Dear retailers,

Not only ethically motivated customers are now asking for plastic-free, vegan, organic and/or fair trade alternatives in all areas of life. These topics have arrived in the middle of society and even some legislators are finally demanding fairness from their businesses through “supply chain laws”.

We set out five years ago to find alternatives to conventional household and garden products for a greener and fairer future for people and the environment. By buying FAIR ZONE products, your customers should enjoy making an environmental and social impact. With their purchase, they make an important contribution to climate, environment and resource protection, create sustainable jobs in developing countries, and promote social solutions.

We don't just claim our commitment, however, but have it regularly verified by independent seal initiatives. Thus, our FAIR ZONE products bear a variety of seals, which are intended to give your customers a quick orientation. Whether Fairtrade, WFTO (World Fair Trade Organisation), Fair Rubber, FSC®, Climate Partner or Vegan Society – our seal partners make a valuable, active contribution to our social transformation through their work. We would like to thank them and the many volunteers.

And of course we thank you for your support to include FAIR ZONE in your assortment.

Latex tapper in Sri Lanka

Manufacturing from kithul palms

Weaver in Sri Lanka

FROM PLANTS FOR PLANTS — THE NATURAL RUBBER PLANT POT

- AVAILABLE IN MANY TREND COLORS
- REUSABLE. SUITABLE FOR INDOORS AND OUTDOORS
- DURABLE FROM FAIRLY TRADED FSC® 100% CERTIFIED NATURAL RUBBER
- NO ABRASION OF MICROPLASTICS

Instead of cheap plastic in the organic garden, we now offer long-lasting flower pots made from fairly traded FSC®-100% certified natural rubber. Due to the flexibility of natural rubber, plants can be easily repotted.

PLASTIC

- PLASTIC POTS ARE OFTEN TO BE USED ONLY ONCE
- PLASTIC SEED TRAYS TEAR QUICKLY
- DANGER DUE TO MICRO PLASTIC AND PLASTICIZERS
- PLASTIC IS NOT A NATURAL PRODUCT, THE BASIS ARE FOSSIL FUELS

NATURAL RUBBER

- LONG DURABILITY, REUSABLE
- GENTLE AND EASY REMOVAL OF THE YOUNG PLANTS
- THICK-WALLED YET FLEXIBLE MATERIAL
- NATURAL LATEX IS A RENEWABLE RAW MATERIAL

Fairly traded and made of FSC® 100% certified natural rubber. Seed tray for multiple use. The individual cells are suitable for raising sprouts. With this seed tray, organic plant raising succeeds. Unlike conventional products, this one is plastic-free.

THE ECO PLANT TIE – A FAIR CONNECTION WITHOUT SIDE EFFECT

- FOR FIXING PLANTS AND CABLES EASY TO ATTACH
- REUSABLE
- DURABLE FROM FAIRLY TRADED FSC® 100% CERTIFIED NATURAL RUBBER
- NO ABRASION OF MICROPLASTICS

The versatile plant and cable ties are made of fairly traded natural rubber. Plants can be easily attached to climbing sticks with these ties. They can also be used as cable ties. The practical locking hook ensures that they are just as easy to detach as they are to attach.

The natural rubber replaces plastic in the garden. It decomposes over time without leaving microplastics. The color used in the rubber is also free of harmful substances.

DIAMETER RUBBER: 5 CM
WEIGHT: NET 100 G

A GOOD DROP — LONG-TERM WATER DISPENSER FROM CLAY

- **COMPATIBLE FOR VARIOUS LONG NECK BOTTLES**
- **KEEPS THE SOIL PERMANENTLY MOIST**
- **REUSABLE**

The Self Watering Spikes act as a water dispenser. When the flower soil is dry the water enters the soil through the clay spike, until the soil is sufficiently watered. Clay has the property of storing water and releasing it gradually. Thus, the soil remains permanently moist. The spikes are ideal for watering during the vacations. They are suitable for many different sized long-neck bottles and support healthy plant growth.

DIMENSIONS:
21.5 CM, Ø 5.5 CM
WEIGHT: 223 G / PC.

4 PCS., ART.-NO.: 4800073
EAN: 4260365851471

APPLICATION:

WATER DISPENSER (SPIKE)
WATER FOR 1-2 HOURS

INSERT THE WATER DISPENSER DEEP INTO THE SOIL

PUT A GLASS BOTTLE FILLED WITH WATER ON THE SPIKE AND THE WATERING IS DONE.

IN WINTER STORE DRY.
THE PRODUCT IS NOT FROST RESISTANT.

FAIR AND NATURAL — THE GOOD OLD RUBBER BANDS

- **REUSABLE. SUITABLE FOR INDOORS AND OUTDOORS**
- **DURABLE FROM FAIRLY TRADED FSC® 100% CERTIFIED NATURAL RUBBER**
- **NO ABRASION OF MICROPLASTICS**

FROM RICE SACK TO LEAF SACK: THE UPCYCLING- GARDEN BAG

- REUSABLE AND EASILY FOLDABLE
- SUITABLE FOR INDOOR AND OUTDOOR USE
- DURABLE FROM RICE BAGS
- EXTREMELY TEAR RESISTANT (UP TO 50 KG)
- MANUFACTURED IN A FAIR TRADE PROJECT BY WOMEN IN SRI LANKA (WFTO CERTIFIED)
- EACH GARDEN BAG IS UNIQUE

The fairly produced garden bag made from upcycled rice sacks is suitable for damp grass, twigs, dry leaves or roots. It is robust and tear-resistant due to the reinforced cross seams. Garden waste can therefore be transported very well. Outdoor toys or garden tools can also be optimally stored in it and remain protected by the moisture-repellent material. Before processing, the rice sacks are carefully cleaned.

HERE COMES THE COCONUT – **BIRD FEEDER** FOR THE GREEN OASIS

- THE ENTRANCE HOLE (4 CM) PROTECTS THE YOUNG BIRDS FROM WIND, RAIN AND PREDATORS WHILE FEEDING
- SPECIES-APPROPRIATE NATURAL PRODUCT FOR THE GARDEN
- ROBUST ROOF PROTECTS FROM WEATHER
- WITH NATURAL CORD TO HANG UP

Handmade birdhouse made of coconut for hanging in the garden or on the balcony.

The birdhouse serves as a feeding station and is fairly handcrafted (WFTO certified) in Sri Lanka. It consists of a single, whole coconut. The shell of the nut is carved to serve as a roof. The suspension consists of a rope made of coconut fibers. The birdhouse is therefore 100% natural, sustainable and visually blends well into the garden.

FUROSHIKI — THE COTTON ALLROUNDER

Derived from Japanese, Furoshiki describes a squared wrapping cloth which is used as an alternative to common packaging materials for presents. It is also used as a wrap for the popular bento box in Asian countries, which makes it easier to carry. Here in Europe, those practical cloths have been named “Bündel” in former times.

The special: They are made from worn and cleaned saris in Sri Lanka. For this purpose, at least always two different saris are sewn against each other.

Each cloth is unique with different design in color and pattern. The FAIR ZONE Furoshiki is available in four sizes.

PALM TREES IN THE BATHROOM

– SOAP DISHES, COMB AND TOOTHBRUSH HOLDER

BATHROOM ACCESSORIES FROM THE KITHUL PALM TREE

On the south coast of Sri Lanka, agricultural kithul palms that are no longer in use are processed for further use as bathroom accessories as part of a fair trade project (WFTO certified). Kithul is popularly used by artisans to produce high quality traditional handcrafts.

COMB

The natural wood reduces hair breakage and split ends. With its characteristic grain, it is made into a sturdy comb that fits very well in the hand.

THE 17 UN SUSTAINABLE DEVELOPMENT GOALS AND OUR COMMITMENT

In September 2015, within the United Nations community, the 2030 Agenda for Sustainable Development was adopted. The involved 193 States have formulated in this context the so-called “goals for sustainable development” (Sustainable Development Goals, SDGs for short). These were considered cornerstones of the development and sustainability policy for the next 15 years.

Fair Trade, FAIR SQUARED and fulfilment of the SDGs

Did you know that many of the UN goals have long been implemented by the Fair Trade Movement? This is how we have been working since FAIR SQUARED was founded in 2010 on many sustainability goals that have been defined as “global goals”.

The SDGs of the 2030 agenda

Source: Global Goals, UN

Access to fresh water:
Fountain project on Sri Lanka

Collecting plastic bottles:
Upcycling project on Sri Lanka

Sustainable cultivation:
Latex tapper in India

GOAL 1: NO POVERTY

We pay a fixed minimum price for our Fairtrade commodities plus a premium. This contributes to the long-term improvement of the financial conditions of our partners, so that they can invest in sustainable projects.

GOAL 2: NO HUNGER

The price of raw materials we pay our trading partners is being established independently of the world market prices. This ensures that they still get by, even in times of lower world market prices.

GOAL 5: GENDER JUSTICE

We and the actors of fair trade make every effort to achieve the gender-independent equality in the global south. For this reason, for example, womens' labour rights are specifically supported, so that they can work on an equal basis and can thus increase their own future prospects.

GOAL 6: CLEAN WATER AND SANITARY FACILITIES

By means of premiums, about their use the workers and self-elected committees decide, well projects have already been realised, that enable access to clean drinking water.

GOAL 12: SUSTAINABLE CONSUMPTION AND PRODUCTION

Of course, as a manufacturer and trader we are interested in selling our products. However this

must not happen at the expense of the environment. For example, we compensate all our emissions through climate protection projects. Furthermore we are about to change our assortment to completely "plastic-free" and are committed to setting up more sustainable industry solutions.

GOAL 13: CLIMATE PROTECTION MEASURES

Through our work, we promote the resource-saving cultivation of plant-based raw materials under Fairtrade conditions. In addition to that, we support organic farming and use the chance to make climate-friendly and FSC® certified products attractive for consumers as an alternative to conventional ones.

GOAL 14: LIFE UNDER WATER

Our responsibility does not only extend to life on land. Much more, especially the marine ecosystem is threatened by our way of living. As a small Ocean Plastic Project, we've found a way, together with our partners in Sri Lanka, to upcycle the PP bottle caps and by this to contribute to the fact that they don't end up in the sea.

GOAL 15: LIFE ON LAND

Only an intact ecosystem can continue to meet the needs of humans and animals in the future. That's why we use FSC® certified raw materials and champion sustainable and fair conditions for the tapping of latex in India, Thailand and Sri Lanka.

OUR PARTNERS

As one of the first producers for cosmetics worldwide, we are allowed to label our products with the renowned Fairtrade mark due to their conformity to the organisation's guidelines. Furthermore, the FAIR SQUARED cosmetic products are labelled with the NATRUE mark for verified natural cosmetics, and the Vegan Society label. „Fairtrade – Natural – Vegan“ – if that is everything your costumers want to know. With our hygiene and cosmetic products you can support the fair partnership with producers from the poorer areas of the world.

FAIR SQUARED PRODUCTS CARRY THE LABELS OF THE FOLLOWING LICENSE PARTNERS:

FAIRTRADE

FAIR SQUARED is primarily a company which implements the objectives of the Fair Trade movement and puts it in the enterprise center. We are one of the first companies worldwide that have been granted the FLO seal for cosmetic products and probably the only ones in this category whose whole product range is exclusively labelled Fairtrade. www.fairtrade.net

BUT WHAT DOES FAIR TRADE REALLY MEAN?

- No child or compulsory labor
- A guaranteed cost-covering minimum wage for producers
- Fairtrade premiums that are independent from the market price
- Fair working conditions (paychecks, security, working hours...)
- Long-term trade relationships
- Transparent conditions
- The possibility of pre-financing
- Democracy in cooperatives or working committees
(shared profit, all votes are of equal worth)

All criteria were controlled by the independent FLOCERT (www.flocert.net) through continuous audits of all license partners (producers and traders). Only the ones who could fulfill the criteria and thereafter continuously work according to them are granted with the well-known Fairtrade mark. About 90 % of the European population recognizes the Fairtrade label and 95 % of this percentage trust it.

NATRUE

Founded in 2007, NATRUE is a Brussels based international non-profit association committed to promoting and protecting natural and organic cosmetics worldwide. The NATRUE label is a guarantee for cosmetic products to always be as natural as possible. The products labelled with the NATRUE sign are of high standard and are divided into three different levels depending on how much organic ingredients they contain. The FAIR SQUARED products reach the first stage. We would very much like to achieve a higher level, that is however at the time not possible. Our products are certainly organically produced, but the needed documentations are either because of financial or organizational reasons not possible at the moment. www.natrue.org

FAIR SQUARED products are allowed to carry the NATRUE logo because they are always produced as natural as possible. In practice, this means:

- Using natural and organic ingredients
- Gentle manufacturing processes
- Environmentally friendly practices
- Not using synthetic fragrances and/ or colours
- Not using ingredients deriving from petro-chemistry
- Not using GMO ingredients
- Not using radiation on the finished product or on the herbal ingredients

VEGAN SOCIETY

The seal of the international society “The Vegan Society” (with headquarters in Birmingham) is not only to be found on cosmetic products, but also on food, packaging, clothes, cleaning products, and others. The logo guarantees that the product does not contain any animal products. FAIR SQUARED products are certified by the English Vegan Society and meet their standards. www.vegansociety.com

Here is an extract from their standards:

- Animal Ingredients: The manufacturer and/or producer may not involve or have involved the usage of any animal products or animal by-products in their product or by the manufacturing of their product.
- Animal Testing: The development and/or manufacture of the product may not involve or have involved testing of any sort on animals conducted at the initiative of the company or that has been carried out by a party/parties over whom the company has effective control.
- Genetically Modified Organisms: The development and/or production of genetically modified organisms (GMO) may not have involved concerning animal genes or animal-derived substances. Products containing GMOs must be labelled as such.

FAIR RUBBER

Not all raw materials that FAIR SQUARED process are covered by the Fairtrade Labelling Organizations International (FLO). There are simply too many natural raw materials for that. One of these raw materials is natural rubber. It is produced from the sap of the tropical tree “*Hevea brasiliensis*”. The aim of the Fair Rubber Association is “to contribute to an improvement of the working and living conditions of the primary producers of natural latex by applying the principles of Fair Trade to the trade in products made from natural rubber”. That is what their statute says. But what does it actually mean? Fair Rubber is good for the people. Participation in Fair Trade should be an option, particularly for the primary producers of natural rubber, the rubber tree tappers, and small rubber-farmers.

But the low prices paid for raw materials make it impossible for the tappers, plantation workers, and small-scale farmers to support themselves and their families. This is where Fair Rubber wants to help:

Paying a Fair Trade premium of 0.50 € per kilo of natural rubber to the primary producers ensures that even during periods of depressed world market prices, the costs of production would be covered and the suppliers would have a surplus. Crucially, this would allow them to improve their working and living conditions. The decision of how this premium is to be used remains with the workers: for example by the management board for small-scale farmer associations, or in plantations by a panel consisting of selected employee representatives and delegated management. The FAIR SQUARED products which carry the Fair Rubber association’s label are condoms, Period Cups, and future products made of fairly traded natural rubber. www.fairrubber.org

LATEST NEWS: The Committee for Standards at WFTO (World Fair Trade Organization) has come to the conclusion that the certification system of FAIR RUBBER e.V. is considered an equivalent Fair Trade system. Therefore they recommend the recognition of FAIR RUBBER e.V by WFTO. The Board of WFTO has not yet made a decision on this matter.

WFTO – WORLD FAIR TRADE ORGANISATION

Die WFTO ist die globale Gemeinschaft und Prüfinstanz für soziale Unternehmen, die den Fairen Handel vollständig praktizieren. Die WFTO-Mitglieder sind in 76 Ländern vertreten und dienen alle marginalisierten Gemeinschaften. Um WFTO-Mitglied zu werden, muss ein Unternehmen oder eine Organisation nachweisen, dass sie bei allem, was sie tun, die Menschen und den Planeten an die erste Stelle setzen. Die WFTO wird demokratisch von ihren Mitgliedern geführt, die Teil einer breiteren Gemeinschaft von über 1.000 Sozialunternehmen und 1.500 Geschäften sind. Fair Squared ist ein Erstkäufer innerhalb der WFTO. Ein Erstkäufer ist ein Geschäft, das Produkte von einem garantiert fair gehandelten Unternehmen kauft. In unserem Fall ist es Rice&Carry aus Sri Lanka, deren Produkte wir mit unseren Marken FAIR SQUARED, FAIRMOVE oder FAIR ZONE auszeichnen. www.wfto.com

FSC® – FOREST STEWARDSHIP COUNCIL

The FSC® (Forest Stewardship Council®) is committed to promoting an eco-friendly, socially responsible and economically viable management of forests which meets the social, economic and ecological needs of present and future generations. The label ensures that only FSC® certified and controlled materials will be used at any time of the production chain. For the production of FSC® certified products the following materials can be used:

FSC® certified quantities, controlled wood or recycled materials. Depending on the FSC® label, one can see whether the product is made only with material from FSC® certified forests (FSC® 100 %), if it is made with recycled, certified material (FSC® recycled), or if it consists of a mixture of certified and controlled materials (FSC® mix). Only the products that are identified as such on this document are FSC® certified. www.fsc-deutschland.de

CLIMATEPARTNER

Everything we do – the production of our products, transport, running offices and administration – causes CO2 emissions. Climate change does not just affect us and future generations, Fair Trade producers, too, already experience significant changes and disadvantages. That's why we decided to have our emissions analysed by the independent company ClimatePartner (www.climatepartner.com), to reduce emissions as far as possible and offset the rest through different climate projects. As early as 2014 we offset the FAIR SQUARED condoms through the afforestation project 'biosphere reservation Schaalsee'.

Our complete assortment's emissions are compensated by a Gold Standard Fairtrade project in Raichur (a rural district in Central India). By the purchase of clean and efficient pressure cookers we offset our emissions. Our production is therefore considered "climate-neutrally". www.climatepartner.com
