On the occasion of the 30th anniversary of Fairtrade in Germany, a series of soaps was developed by our Syrian soap master Mohamad Khiro from Aleppo. The important Fairtrade raw materials, coconut, tea, coffee and shea butter play the main role. They are handcrafted into solid body, face, shaving and hand soaps and offered in Jubilee packs.

HAIR SOAP COCONUT

The basis of the coconut soap is a fairly traded coconut oil. The coconut oil is particularly rich in vitamins, fatty acids and minerals. It has a balancing effect and delays the after-greasing of the hair. Optimal nourishing with a light coconut odour. The coconut hair soap cleanses the hair in a completely natural way.

Here it is, the first Cologne soap with sustainable and certified Fairtrade ingredients. Behind the FAIR SQUARED Cologne soap is the approach to process regional ingredients with Fairtrade raw materials into caring hair soaps. And above all, the idea of giving the hop, known for its special hair-care properties, a special role.

Together with Bio-Kölsch from the Heller brewery, we have developed a series of Bio-Kölsch soaps that offer lasting care for every type of hair.

FUROSHIKI

Derived from Japanese, Furoshiki describes a squared wrapping cloth which is used as an alternative to common packaging materials for presents. It is also used as a wrap for the popular bento box in Asian countries, which makes it easier to carry. Here in Europe, those practical cloths have been named "Bündel" in former times.

The special: They are made from worn and cleaned saris in Sri Lanka. For this purpose, at least always two different saris are sewn against each other.

Each cloth is unique with different design in color and pattern. The FAIR ZONE Furoshiki is available in four sizes.

FAIR SQUARED GOES **ZERO WASTE**: A PROCESS

Since 2018, our closed-loop system for cosmetic packaging made of glass has already been successfully in operation. This way, our customers and we have already saved several tons of single-use plastic waste and contributed to a better carbon footprint.

FAIR NATURAL COSMETICS IN A RETURNABLE SYSTEM

1. PURCHASE IN RETAIL SHOPS
2. SALE TO SUSTAINABLE ORIENTED CUSTOMERS
3. TAKE THE GLASSES HOME – USAGE OF COSMETICS
4. TAKE BACK THE EMPTY GLASSES
5. SEND THEM BACK TO FAIR SQUARED FOR CLEANING
6. REFILLING OF THE GLASSES... AND THE CIRCLE RESUMES

PRODUCT CARBON FOOTPRINT (GLASS CONTAINERS DISPOSABLE VS. REUSABLE)

We have had the FAIR SQUARED cycle system evaluated by ClimatePartner on the basis of the “Greenhouse Gas Protocol Product Life Cycle Accounting and Reporting Standard” (GHG Protocol). The result shows that glass containers from the FAIR SQUARED reusable cosmetics system produce less than half the greenhouse gas emissions despite interlogistics, than those from a single-use system in which customers dispose of their glass containers in waste glass.

- Glass as long-lasting material
- Reusable glass jar save half of the carbon emissions compared to single-use glass jar. Carbon emissions: kgCO₂ per glass (100 ml) = 0,0505 kg (calculated by ClimatePartner, December 2019)
- Easy to clean and refill
- Returnable system that includes distributors and customers into the Zero Waste process

NEW: PLASTIC-FREE LID SEALS MADE OF NATURAL RUBBER

- Previous EPE inlays are replaced by rubber

THE 17 UN SUSTAINABLE DEVELOPMENT GOALS AND OUR COMMITMENT

In September 2015, within the United Nations community, the 2030 Agenda for Sustainable Development was adopted. The involved 193 States have formulated in this context the so-called “goals for sustainable development” (Sustainable Development Goals, SDGs for short). These were considered cornerstones of the development and sustainability policy for the next 15 years.

Fair Trade, FAIR SQUARED and fulfilment of the SDGs

Did you know that many of the UN goals have long been implemented by the Fair Trade Movement? This is how we have been working since FAIR SQUARED was founded in 2010 on many sustainability goals that have been defined as “global goals”.

GOAL 1: NO POVERTY

We pay a fixed minimum price for our Fairtrade commodities plus a premium. This contributes to the long-term improvement of the financial conditions of our partners, so that they can invest in sustainable projects.

GOAL 2: NO HUNGER

The price of raw materials we pay our trading partners is being established independently of the world market prices. This ensures that they still get by, even in times of lower world market prices.

GOAL 5: GENDER JUSTICE

We and the actors of fair trade make every effort to achieve the gender-independent equality in the global south. For this reason, for example, womens' labour rights are specifically supported, so that they can work on an equal basis and can thus increase their own future prospects.

GOAL 6: CLEAN WATER AND SANITARY FACILITIES

By means of premiums, about their use the workers and self-elected committees decide, well projects have already been realised, that enable access to clean drinking water.

GOAL 12: SUSTAINABLE CONSUMPTION AND PRODUCTION

Of course, as a manufacturer and trader we are interested in selling our products. However this

must not happen at the expense of the environment. For example, we compensate all our emissions through climate protection projects. Furthermore we are about to change our assortment to completely "plastic-free" and are committed to setting up more sustainable industry solutions.

GOAL 13: CLIMATE PROTECTION MEASURES

Through our work, we promote the resource-saving cultivation of plant-based raw materials under Fairtrade conditions. In addition to that, we support organic farming and use the chance to make climate-friendly and FSC® certified products attractive for consumers as an alternative to conventional ones.

GOAL 14: LIFE UNDER WATER

Our responsibility does not only extend to life on land. Much more, especially the marine ecosystem is threatened by our way of living. As a small Ocean Plastic Project, we've found a way, together with our partners in Sri Lanka, to upcycle the PP bottle caps and by this to contribute to the fact that they don't end up in the sea.

GOAL 15: LIFE ON LAND

Only an intact ecosystem can continue to meet the needs of humans and animals in the future. That's why we use FSC® certified raw materials and champion sustainable and fair conditions for the tapping of latex in India, Thailand and Sri Lanka.

OUR PARTNERS

As one of the first producers for cosmetics worldwide, we are allowed to label our products with the renowned Fairtrade mark due to their conformity to the organisation's guidelines. Furthermore, the FAIR SQUARED cosmetic products are labelled with the NATRUE mark for verified natural cosmetics, and the Vegan Society label. „Fairtrade – Natural – Vegan“ – if that is everything your costumers want to know. With our hygiene and cosmetic products you can support the fair partnership with producers from the poorer areas of the world.

FAIR SQUARED PRODUCTS CARRY THE LABELS OF THE FOLLOWING LICENSE PARTNERS:

FAIRTRADE

FAIR SQUARED is primarily a company which implements the objectives of the Fair Trade movement and puts it in the enterprise center. We are one of the first companies worldwide that have been granted the FLO seal for cosmetic products and probably the only ones in this category whose whole product range is exclusively labelled Fairtrade. www.fairtrade.net

BUT WHAT DOES FAIR TRADE REALLY MEAN?

- No child or compulsory labor
- A guaranteed cost-covering minimum wage for producers
- Fairtrade premiums that are independent from the market price
- Fair working conditions (paychecks, security, working hours...)
- Long-term trade relationships
- Transparent conditions
- The possibility of pre-financing
- Democracy in cooperatives or working committees
(shared profit, all votes are of equal worth)

All criteria were controlled by the independent FLOCERT (www.flocert.net) through continuous audits of all license partners (producers and traders). Only the ones who could fulfill the criteria and thereafter continuously work according to them are granted with the well-known Fairtrade mark. About 90 % of the European population recognizes the Fairtrade label and 95 % of this percentage trust it.

NATRUE

Founded in 2007, NATRUE is a Brussels based international non-profit association committed to promoting and protecting natural and organic cosmetics worldwide. The NATRUE label is a guarantee for cosmetic products to always be as natural as possible. The products labelled with the NATRUE sign are of high standard and are divided into three different levels depending on how much organic ingredients they contain. The FAIR SQUARED products reach the first stage. We would very much like to achieve a higher level, that is however at the time not possible. Our products are certainly organically produced, but the needed documentations are either because of financial or organizational reasons not possible at the moment. www.natrue.org

FAIR SQUARED products are allowed to carry the NATRUE logo because they are always produced as natural as possible. In practice, this means:

- Using natural and organic ingredients
- Gentle manufacturing processes
- Environmentally friendly practices
- Not using synthetic fragrances and/ or colours
- Not using ingredients deriving from petro-chemistry
- Not using GMO ingredients
- Not using radiation on the finished product or on the herbal ingredients

VEGAN SOCIETY

The seal of the international society “The Vegan Society” (with headquarters in Birmingham) is not only to be found on cosmetic products, but also on food, packaging, clothes, cleaning products, and others. The logo guarantees that the product does not contain any animal products. FAIR SQUARED products are certified by the English Vegan Society and meet their standards. www.vegansociety.com

Here is an extract from their standards:

- Animal Ingredients: The manufacturer and/or producer may not involve or have involved the usage of any animal products or animal by-products in their product or by the manufacturing of their product.
- Animal Testing: The development and/or manufacture of the product may not involve or have involved testing of any sort on animals conducted at the initiative of the company or that has been carried out by a party/parties over whom the company has effective control.
- Genetically Modified Organisms: The development and/or production of genetically modified organisms (GMO) may not have involved concerning animal genes or animal-derived substances. Products containing GMOs must be labelled as such.

FAIR RUBBER

Not all raw materials that FAIR SQUARED process are covered by the Fairtrade Labelling Organizations International (FLO). There are simply too many natural raw materials for that. One of these raw materials is natural rubber. It is produced from the sap of the tropical tree “*Hevea brasiliensis*”. The aim of the Fair Rubber Association is “to contribute to an improvement of the working and living conditions of the primary producers of natural latex by applying the principles of Fair Trade to the trade in products made from natural rubber”. That is what their statute says. But what does it actually mean? Fair Rubber is good for the people. Participation in Fair Trade should be an option, particularly for the primary producers of natural rubber, the rubber tree tappers, and small rubber-farmers.

But the low prices paid for raw materials make it impossible for the tappers, plantation workers, and small-scale farmers to support themselves and their families. This is where Fair Rubber wants to help:

Paying a Fair Trade premium of 0.50 € per kilo of natural rubber to the primary producers ensures that even during periods of depressed world market prices, the costs of production would be covered and the suppliers would have a surplus. Crucially, this would allow them to improve their working and living conditions. The decision of how this premium is to be used remains with the workers: for example by the management board for small-scale farmer associations, or in plantations by a panel consisting of selected employee representatives and delegated management. The FAIR SQUARED products which carry the Fair Rubber association’s label are condoms, Period Cups, and future products made of fairly traded natural rubber. www.fairrubber.org

LATEST NEWS: The Committee for Standards at WFTO (World Fair Trade Organization) has come to the conclusion that the certification system of FAIR RUBBER e.V. is considered an equivalent Fair Trade system. Therefore they recommend the recognition of FAIR RUBBER e.V by WFTO. The Board of WFTO has not yet made a decision on this matter.

WFTO – WORLD FAIR TRADE ORGANISATION

WFTO is the global community and auditing body for social enterprises that fully practice Fair Trade. WFTO members are represented in 76 countries and all serve marginalized communities. To become a WFTO member, a company or organization must demonstrate that they put people and the planet first in everything they do. WFTO is democratically governed by its members, who are part of a broader community of over 1,000 social enterprises and 1,500 businesses. Fair Squared is a first-time buyer within WFTO. A first-time buyer is a store that buys products from a guaranteed fair trade company. In our case, it is Rice&Carry from Sri Lanka, whose products we mark with our FAIR SQUARED, FAIRMOVE or FAIR ZONE brands. www.wfto.com

FSC® – FOREST STEWARDSHIP COUNCIL

The FSC® (Forest Stewardship Council®) is committed to promoting an eco-friendly, socially responsible and economically viable management of forests which meets the social, economic and ecological needs of present and future generations. The label ensures that only FSC® certified and controlled materials will be used at any time of the production chain. For the production of FSC® certified products the following materials can be used:

FSC® certified quantities, controlled wood or recycled materials. Depending on the FSC® label, one can see whether the product is made only with material from FSC® certified forests (FSC® 100 %), if it is made with recycled, certified material (FSC® recycled), or if it consists of a mixture of certified and controlled materials (FSC® mix). Only the products that are identified as such on this document are FSC® certified.

CLIMATEPARTNER

Everything we do – the production of our products, transport, running offices and administration – causes CO2 emissions. Climate change does not just affect us and future generations, Fair Trade producers, too, already experience significant changes and disadvantages. That's why we decided to have our emissions analysed by the independent company ClimatePartner (www.climatepartner.com), to reduce emissions as far as possible and offset the rest through different climate projects. As early as 2014 we offset the FAIR SQUARED condoms through the afforestation project 'biosphere reservation Schaalsee'.

Our complete assortment's emissions are compensated by a Gold Standard Fairtrade project in Raichur (a rural district in Central India). By the purchase of clean and efficient pressure cookers we offset our emissions. Our production is therefore considered "climate-neutrally". **www.climatepartner.com**
