

WE BRING CHANGE TO THE COSMETICS RANGE

Because our products are NATRUE-certified natural cosmetics, which are also made from fairly traded ingredients and are vegan and halal. Now also in environmentally friendly zero-waste format: all products are now available in environmentally friendly glass jars and bottles, which we take back as part of a deposit system.

WHY UNPACKED ?

As we have always felt a sense of responsibility towards people and the environment, it is a personal concern of ours to put a stop to the ongoing littering of nature. Some time ago, we started looking for environmentally friendly solutions for packaging our natural cosmetics and hygiene products. With our practical reusable glass jars, we have found a first way to offer you zero-waste products. Stay tuned, what else we can come up with! Ask in your organic supermarket or health food store. They will be happy to explain how to take back the returnable jars.
