## COOPERATION “30 YEARS OF FAIRTRADE”

On the occasion of the 30th anniversary of Fairtrade in Germany, a series of soaps was developed by our Syrian soap master Mohamad Khirro from Aleppo. The important Fairtrade raw materials, coconut, tea, coffee and shea butter play the main role. They are handcrafted into solid body, face, shaving and hand soaps and offered in Jubilee packs.

HAIR SOAP COCONUT

The basis of the coconut soap is a fairly traded coconut oil. The coconut oil is particularly rich in vitamins, fatty acids and minerals. It has a balancing effect and delays the after-greasing of the hair. Optimal nourishing with a light coconut odour. The coconut hair soap cleanses the hair in a completely natural way.

EAN: 4260663812518

BODY SOAP GREEN TEA

The basis of the green tea body soap is a fairly traded green tea. It is suitable for both normal and sensitive skin and can be used daily. The soap is rich in antioxidants. The skin is clarified, soothed and refreshed by the soap. In addition, green tea is said to have a rejuvenating and healing effect.

80 G, ART.-NO.: 4910621  
EAN: 4260663812631

SHAVING SOAP COFFEE

The shaving soap Coffee provides a safe, comfortable and smooth shave. The product can be used for daily wet shaving as it prevents skin impurities. It provides optimal care for the skin and has a light, pleasant coffee odour.

80 G, ART.-NO.: 4910622  
EAN: 4260663812587

HAND SOAP SHEA

The shea butter hand soap soothes and nourishes the hands. In addition, the hands are supplied with sufficient moisture due to the high fat content of shea butter. The hand soap has a high vitamin content and gives the skin high elasticity.

### BOTTLE COVER 500 ML

Discover FAIR SQUARED's latest innovation: our bottle covers for 500ml bottles, made from FSC-certified natural rubber. These bottle covers are tailor-made for all FAIR SQUARED 500ml glass bottles, such as shampoo and shower lotion.

Not only do these covers provide environmentally friendly protection for the glass bottles, but also minimise the risk of glass breakage in case of knocks or falls. The special structure of the natural rubber improves the grip and makes the use of products such as shampoo or shower lotion, even more comfortable.

The covers are simply slipped over the bottles. After consumption of the contents, they can be removed and used for the next bottle.

### SOAP BOX "RUBYTAINER"

For the clean storage as well as the protected transport of your soap pieces, the Rubytainer is perfect. The soap box is made of fairly traded natural rubber, which is produced in Sri Lanka. With air holes in the lid, the soap can dry ideally and is still ideally packaged. The small size of 8.5 x 7 cm is handy, but at the same time large enough. Especially good for storing our care products, for example our deodorant bars or FAIR SQUARED body lotion.

### COSMATICONTAINER

Handy container made of natural rubber – the perfect companion for on the go! With a compact size of approx. 6 cm in height and 5 cm in length and width, it is ideal for customers who are often on the go.

The Cosmaticontainer offers a filling capacity of approx. 50 ml and is absolutely unbreakable at the same time. This way, your customers can safely transport their cosmetic products in their bag or toiletry bag without them leaking. The container comes with an elastic band that can be tightened around the container to prevent leakage even when moving.

With the Cosmaticontainer, your customers can enjoy their favourite cosmetic products on the go – whether travelling or in everyday life.

# FAIR SQUARED GOES **ZERO WASTE**: A PROCESS

Since 2018, our closed-loop system for cosmetic packaging made of glass has already been successfully in operation. This way, our customers and we have already saved several tons of single-use plastic waste and contributed to a better carbon footprint.

## FAIR NATURAL COSMETICS IN A RETURNABLE SYSTEM

1. PURCHASE IN RETAIL SHOPS
2. SALE TO SUSTAINABLE ORIENTED CUSTOMERS
3. TAKE THE GLASSES HOME – USAGE OF COSMETICS
4. TAKE BACK THE EMPTY GLASSES
5. SEND THEM BACK TO FAIR SQUARED FOR CLEANING
6. REFILLING OF THE GLASSES... AND THE CIRCLE RESUMES

## PRODUCT CARBON FOOTPRINT (GLASS CONTAINERS DISPOSABLE VS. REUSABLE)

We have had the FAIR SQUARED cycle system evaluated by ClimatePartner on the basis of the “Greenhouse Gas Protocol Product Life Cycle Accounting and Reporting Standard” (GHG Protocol). The result shows that glass containers from the FAIR SQUARED reusable cosmetics system produce less than half the greenhouse gas emissions despite interlogistics, than those from a single-use system in which customers dispose of their glass containers in waste glass.

- Glass as long-lasting material
- Reusable glass jar save half of the carbon emissions compared to single-use glass jar. Carbon emissions: kgCO<sub>2</sub> per glass (100 ml) = 0,0505 kg (calculated by ClimatePartner, December 2019)
- Easy to clean and refill
- Returnable system that includes distributors and customers into the Zero Waste process

## NEW: PLASTIC-FREE LID SEALS MADE OF NATURAL RUBBER

- Previous EPE inlays are replaced by rubber
- Sustainable, fairly traded material (“Fair Rubber”)
- Free of plastic and hygienic
- Can be reused

# THE ECO PLANT TIE IN TWO SIZES — A FAIR CONNECTION WITHOUT SIDE EFFECT

ECO PLANT &amp; CABLE TIE MAXI

ECO PLANT &amp; CABLE TIE

- FOR ATTACHING PLANTS AND CABLES
- EASY TO ATTACH
- REUSABLE
- DURABLE MADE FROM FAIRLY TRADED FSC®-100% CERTIFIED NATURAL RUBBER
- NO ABRASION OF MICROPLASTICS

The versatile plant and cable ties are made of fairly traded natural rubber. Plants can be easily attached to climbing sticks with these ties. They can also be used as cable ties. The practical locking hook ensures that they are just as easy to detach as they are to attach.

The natural rubber replaces plastic in the garden. It decomposes over time without leaving microplastics. The color used in the rubber is also free of harmful substances.

- SUPER SOFT TREE BINDER
- DISTANCE BETWEEN SETTINGS 2.5 CM
- TENSIONER MADE OF FAIR TRADED NATURAL RUBBER
- HOLDS TREES OR VEGETABLES UPRIGHT WITHOUT DAMAGING THE PLANT
- ADJUSTABLE

The FAIR ZONE Maxi Eco plant ties are strong enough to provide reliable support for plants, and at the same time are flexible enough to help prevent damage to the plant.

The plant and cable tie made of fair trade natural rubber can be used for different purposes and is adjustable as needed. Through the three holder ungsoptionen with a distance of 2.5 cm are different settings possible. The Maxi Binder has a wide variety of uses, such as in the garden to hold trees or vegetables upright, to fix the garden hose in a coil, to bundle garden tools together.

But also the tidying of cables, the winding of extension cords or the bundling of all kinds of tools is now sustainably possible.

- EACH BAG IS UNIQUE

The fairly produced recyclable collection bag made from upcycled rice sacks has four chambers. This allows recyclables such as paper, green, white and brown glass to be easily separated and transported directly to the recycling container. It has two sturdy carrying handles and is tear resistant due to reinforced cross stitching.

A colorful eye-catcher in every home. Also suitable as a shopping, garden, beach or toy bag.

- COMPATIBLE FOR VARIOUS LONG NECK BOTTLES
- KEEPS THE SOIL PERMANENTLY MOIST
- REUSABLE
- AVAILABLE IN TWO SIZES

The Self Watering Spikes act as a water dispenser. When the flower soil is dry the water enters the soil through the clay spike, until the soil is sufficiently watered. Clay has the property of storing water and releasing it gradually. Thus, the soil remains permanently moist. The spikes are ideal for watering during the vacations. They are suitable for many different sized long-neck bottles and support healthy plant growth.

# CLEAN THING – SOAPS FOR HAND, DOG AND KITCHEN

## DOGGY SOAP COCONUT

The carefully selected oils, such as coconut and cumin oil guarantee gentle cleaning and care. The natural soap has a refatting effect and protects the natural balance of the skin. The cumin oil can have a calming and anti-inflammatory effect and gives the coat a pleasant scent. Dull fur is cared for to the tips thanks to the coconut oil and shines in a natural shine.

In our dog soap was deliberately omitted the addition of fragrances to meet sensitive dog noses.

## OUR PARTNERS

As one of the first producers for cosmetics worldwide, we are allowed to label our products with the renowned Fairtrade mark due to their conformity to the organisation's guidelines. Furthermore, the FAIR SQUARED cosmetic products are labelled with the NATRUE mark for verified natural cosmetics, and the Vegan Society label. „Fairtrade – Natural – Vegan“ – if that is everything your costumers want to know. With our hygiene and cosmetic products you can support the fair partnership with producers from the poorer areas of the world.

FAIR SQUARED PRODUCTS CARRY THE LABELS OF THE FOLLOWING LICENSE PARTNERS:

**FAIRTRADE**

FAIR SQUARED is primarily a company which implements the objectives of the Fair Trade movement and puts it in the enterprise center. We are one of the first companies worldwide that have been granted the FLO seal for cosmetic products and probably the only ones in this category whose whole product range is exclusively labelled Fairtrade. **[www.fairtrade.net](http://www.fairtrade.net)**

BUT WHAT DOES FAIR TRADE REALLY MEAN?

- No child or compulsory labor
- A guaranteed cost-covering minimum wage for producers
- Fairtrade premiums that are independent from the market price
- Fair working conditions (paychecks, security, working hours...)
- Long-term trade relationships
- Transparent conditions
- The possibility of pre-financing
- Democracy in cooperatives or working committees  
(shared profit, all votes are of equal worth)

All criteria were controlled by the independent FLOCERT ([www.flocert.net](http://www.flocert.net)) through continuous audits of all license partners (producers and traders). Only the ones who could fulfill the criteria and thereafter continuously work according to them are granted with the well-known Fairtrade mark. About 90 % of the European population recognizes the Fairtrade label and 95 % of this percentage trust it.

**VEGAN SOCIETY**

The seal of the international society “The Vegan Society” (with headquarters in Birmingham) is not only to be found on cosmetic products, but also on food, packaging, clothes, cleaning products, and others. The logo guarantees that the product does not contain any animal products. FAIR SQUARED products are certified by the English Vegan Society and meet their standards. **[www.vegansociety.com](http://www.vegansociety.com)**

Here is an extract from their standards:

- Animal Ingredients: The manufacturer and/or producer may not involve or have involved the usage of any animal products or animal by-products in their product or by the manufacturing of their product.
- Animal Testing: The development and/or manufacture of the product may not involve or have involved testing of any sort on animals conducted at the initiative of the company or that has been carried out by a party/parties over whom the company has effective control.
- Genetically Modified Organisms: The development and/or production of genetically modified organisms (GMO) may not have involved concerning animal genes or animal-derived substances. Products containing GMOs must be labelled as such.

## FAIR RUBBER

Not all raw materials that FAIR SQUARED process are covered by the Fairtrade Labelling Organizations International (FLO). There are simply too many natural raw materials for that. One of these raw materials is natural rubber. It is produced from the sap of the tropical tree “*Hevea brasiliensis*”. The aim of the Fair Rubber Association is “to contribute to an improvement of the working and living conditions of the primary producers of natural latex by applying the principles of Fair Trade to the trade in products made from natural rubber”. That is what their statute says. But what does it actually mean? Fair Rubber is good for the people. Participation in Fair Trade should be an option, particularly for the primary producers of natural rubber, the rubber tree tappers, and small rubber-farmers.

But the low prices paid for raw materials make it impossible for the tappers, plantation workers, and small-scale farmers to support themselves and their families. This is where Fair Rubber wants to help:

Paying a Fair Trade premium of 0.50 € per kilo of natural rubber to the primary producers ensures that even during periods of depressed world market prices, the costs of production would be covered and the suppliers would have a surplus. Crucially, this would allow them to improve their working and living conditions. The decision of how this premium is to be used remains with the workers: for example by the management board for small-scale farmer associations, or in plantations by a panel consisting of selected employee representatives and delegated management. The FAIR SQUARED products which carry the Fair Rubber association’s label are condoms, Period Cups, and future products made of fairly traded natural rubber. [www.fairrubber.org](http://www.fairrubber.org)

**LATEST NEWS:** The Committee for Standards at WFTO (World Fair Trade Organization) has come to the conclusion that the certification system of FAIR RUBBER e.V. is considered an equivalent Fair Trade system. Therefore they recommend the recognition of FAIR RUBBER e.V by WFTO. The Board of WFTO has not yet made a decision on this matter.

## FSC® – FOREST STEWARDSHIP COUNCIL

The FSC® (Forest Stewardship Council®) is committed to promoting an eco-friendly, socially responsible and economically viable management of forests which meets the social, economic and ecological needs of present and future generations. The label ensures that only FSC® certified and controlled materials will be used at any time of the production chain. For the production of FSC® certified products the following materials can be used:

FSC® certified quantities, controlled wood or recycled materials. Depending on the FSC® label, one can see whether the product is made only with material from FSC® certified forests (FSC® 100 %), if it is made with recycled, certified material (FSC® recycled), or if it consists of a mixture of certified and controlled materials (FSC® mix). Only the products that are identified as such on this document are FSC® certified.

Fair Trade Enterprise.

## WFTO – WORLD FAIR TRADE ORGANISATION

WFTO is the global community and auditing body for social enterprises that fully practice Fair Trade. WFTO members are represented in 76 countries and all serve marginalized communities. To become a WFTO member, a company or organization must demonstrate that they put people and the planet first in everything they do. WFTO is democratically governed by its members, who are part of a broader community of over 1,000 social enterprises and 1,500 businesses. Fair Squared is a first-time buyer within WFTO. A first-time buyer is a store that buys products from a guaranteed fair trade company. In our case, it is Rice&Carry from Sri Lanka, whose products we mark with our FAIR SQUARED, FAIRMOVE or FAIR ZONE brands. [www.wfto.com](http://www.wfto.com)

# THE 17 UN SUSTAINABLE DEVELOPMENT GOALS AND OUR COMMITMENT

In September 2015, within the United Nations community, the 2030 Agenda for Sustainable Development was adopted. The involved 193 States have formulated in this context the so-called “goals for sustainable development” (Sustainable Development Goals, SDGs for short). These were considered cornerstones of the development and sustainability policy for the next 15 years.

## Fair Trade, FAIR SQUARED and fulfilment of the SDGs

Did you know that many of the UN goals have long been implemented by the Fair Trade Movement? This is how we have been working since FAIR SQUARED was founded in 2010 on many sustainability goals that have been defined as “global goals”.

## The SDGs of the 2030 agenda

Collecting plastic bottles: Upcycling project on Sri Lanka

### GOAL 1: NO POVERTY

We pay a fixed minimum price for our Fairtrade commodities plus a premium. This contributes to the long-term improvement of the financial conditions of our partners, so that they can invest in sustainable projects.

### GOAL 2: NO HUNGER

The price of raw materials we pay our trading partners is being established independently of the world market prices. This ensures that they still get by, even in times of lower world market prices.

### GOAL 5: GENDER JUSTICE

We and the actors of fair trade make every effort to achieve the gender-independent equality in the global south. For this reason, for example, womens' labour rights are specifically supported, so that they can work on an equal basis and can thus increase their own future prospects.

### GOAL 6: CLEAN WATER AND SANITARY FACILITIES

By means of premiums, about their use the workers and self-elected committees decide, well projects have already been realised, that enable access to clean drinking water.

### GOAL 12: SUSTAINABLE CONSUMPTION AND PRODUCTION

Of course, as a manufacturer and trader we are interested in selling our products. However this

must not happen at the expense of the environment. For example, we compensate all our emissions through climate protection projects. Furthermore we are about to change our assortment to completely "plastic-free" and are committed to setting up more sustainable industry solutions.

### GOAL 13: CLIMATE PROTECTION MEASURES

Through our work, we promote the resource-saving cultivation of plant-based raw materials under Fairtrade conditions. In addition to that, we support organic farming and use the chance to make climate-friendly and FSC® certified products attractive for consumers as an alternative to conventional ones.

### GOAL 14: LIFE UNDER WATER

Our responsibility does not only extend to life on land. Much more, especially the marine ecosystem is threatened by our way of living. As a small Ocean Plastic Project, we've found a way, together with our partners in Sri Lanka, to upcycle the PP bottle caps and by this to contribute to the fact that they don't end up in the sea.

### GOAL 15: LIFE ON LAND

Only an intact ecosystem can continue to meet the needs of humans and animals in the future. That's why we use FSC® certified raw materials and champion sustainable and fair conditions for the tapping of latex in India, Thailand and Sri Lanka.

The FAIR MOVE Flex Bars are specially designed to take muscle strength training to the next level. Thanks to its outstanding ribbed design, this fitness bar not only provides a secure grip, but also allows for effortless gripping and twisting. This innovative design aims to strengthen the elbows, wrists, forearms and hands while increasing flexibility and mobility. It is also great for effective stretching and massaging of the fascia.

It is worth noting that these fitness bars require a resistance from 12 (light) to 20 (strong) kilograms to be bent into a U-shape. This challenge motivates to continuously work on one's strength and make progress.

With a length of 31 cm and a diameter of 4.5 cm, the FAIR MOVE Flex Bar is compact and handy, perfect for training at home or on the go. Made from fair trade natural rubber, this not only supports health but also ethical manufacturing practices.

FOR EVERY KILOGRAM OF NATURAL LATEX THAT WE PROCESS, WE PAY A FAIR TRADE PREMIUM. THE RUBBER PRODUCERS, COOPERATIVES OR WORKERS ON THE PLANTATIONS DECIDE FOR THEMSELVES HOW TO USE THE FAIR TRADE PREMIUM TO IMPROVE THEIR LIVING AND WORKING CONDITIONS.

We and the actors of fair trade make every effort to achieve the gender-independent equality in the global south. For this reason, for example, womens' labour rights are specifically supported, so that they can work on an equal basis and can thus increase their own future prospects.

### GOAL 6: CLEAN WATER AND SANITARY FACILITIES

By means of premiums, about their use the workers and self-elected committees decide, well projects have already been realised, that enable access to clean drinking water.

### GOAL 12: SUSTAINABLE CONSUMPTION AND PRODUCTION

Of course, as a manufacturer and trader we are interested in selling our products. However this

must not happen at the expense of the environment. For example, we compensate all our emissions through climate predection projects. Furthermore we are about to change our assortment to completely "plastic-free" and are committed to setting up more sustainable industry solutions.

### GOAL 13: CLIMATE PREDECTION MEASURES

Through our work, we promote the resource-saving cultivation of plant-based raw materials under Fairtrade conditions. In addition to that, we support organic farming and use the chance to make climate-friendly and FSC® certified products attractive for consumers as an alternative to conventional ones.

### GOAL 14: LIFE UNDER WATER

Our responsibility does not only extend to life on land. Much more, especially the marine ecosystem is threatened by our way of living. As a small Ocean Plastic Project, we've found a way, together with our partners in Sri Lanka, to upcycle the PP bottle caps and by this to contribute to the fact that they don't end up in the sea.

### GOAL 15: LIFE ON LAND

Only an intact ecosystem can continue to meet the needs of humans and animals in the future. That's why we use FSC® certified raw materials and champion sustainable and fair conditions for the tapping of latex in India, Thailand and Sri Lanka.

# Fairly traded Flip Flops

*made from natural rubber*

MADE IN  
SRI LANKA

The mark of  
responsible forestry

Between the perfect relaxation on the wonderful beach of Sri Lanka and the upscale urban life – this is exactly where the WAVES brand positions itself. Because the sandal classics with their colorful design fit wonderfully into our assortment design, we have had them made from fairly traded natural rubber. The result are very different colorful models that we would like to offer you:

## FAIR RUBBER

Not all raw materials that FAIR SQUARED process are covered by the Fairtrade Labelling Organizations International (FLO). There are simply too many natural raw materials for that. One of these raw materials is natural rubber. It is produced from the sap of the tropical tree “*Hevea brasiliensis*”. The aim of the Fair Rubber Association is “to contribute to an improvement of the working and living conditions of the primary producers of natural latex by applying the principles of Fair Trade to the trade in products made from natural rubber”. That is what their statute says. But what does it actually mean? Fair Rubber is good for the people. Participation in Fair Trade should be an option, particularly for the primary producers of natural rubber, the rubber tree tappers, and small rubber-farmers.

But the low prices paid for raw materials make it impossible for the tappers, plantation workers, and small-scale farmers to support themselves and their families. This is where Fair Rubber wants to help:

Paying a Fair Trade premium of 0.50 € per kilo of natural rubber to the primary producers ensures that even during periods of depressed world market prices, the costs of production would be covered and the suppliers would have a surplus. Crucially, this would allow them to improve their working and living conditions. The decision of how this premium is to be used remains with the workers: for example by the management board for small-scale farmer associations, or in plantations by a panel consisting of selected employee representatives and delegated management. The FAIR SQUARED products which carry the Fair Rubber association’s label are condoms, Period Cups, and future products made of fairly traded natural rubber. ## FSC® – FOREST STEWARDSHIP COUNCIL

The FSC® (Forest Stewardship Council®) is committed to promoting an eco-friendly, socially responsible and economically viable management of forests which meets the social, economic and ecological needs of present and future generations. The label ensures that only FSC® certified and controlled materials will be used at any time of the production chain. For the production of FSC® certified products the following materials can be used:

FSC® certified quantities, controlled wood or recycled materials. Depending on the FSC® label, one can see whether the product is made only with material from FSC® certified forests (FSC® 100 %), if it is made with recycled, certified material (FSC® recycled), or if it consists of a mixture of certified and controlled materials (FSC® mix). Only the products that are identified as such on this document are FSC® certified. [www.fsc-deutschland.de](http://www.fsc-deutschland.de)

# THE 17 UN SUSTAINABLE DEVELOPMENT GOALS AND OUR COMMITMENT

In September 2015, within the United Nations community, the 2030 Agenda for Sustainable Development was adopted. The involved 193 States have formulated in this context the so-called “goals for sustainable development” (Sustainable Development Goals, SDGs for short). These were considered cornerstones of the development and sustainability policy for the next 15 years.

## Fair Trade, FAIR SQUARED and fulfilment of the SDGs

Did you know that many of the UN goals have long been implemented by the Fair Trade Movement? This is how we have been working since FAIR SQUARED was founded in 2010 on many sustainability goals that have been defined as “global goals”.

## GOAL 1: NO POVERTY

We pay a fixed minimum price for our Fairtrade commodities plus a premium. This contributes to the long-term improvement of the financial conditions of our partners, so that they can invest in sustainable projects.

## GOAL 2: NO HUNGER

The price of raw materials we pay our trading partners is being established independently of the world market prices. This ensures that they still get by, even in times of lower world market prices.

## GOAL 5: GENDER JUSTICE

We and the actors of fair trade make every effort to achieve the gender-independent equality in the global south. For this reason, for example, womens' labour rights are specifically supported, so that they can work on an equal basis and can thus increase their own future prospects.

## GOAL 6: CLEAN WATER AND SANITARY FACILITIES
